

CUSTOM, PRECISION PLASTIC INJECTION MOLDING SERVICES

## Rapid Turn Around + Problem Solving

Since its inception, the cornerstone of **Legacy Molding's** operating principles has always been the mandate to provide customers with rapid turn around and problem solving during each phase of the project.

*Transforming a difficult process into a controlled process is our strength!*

## Complete Injection Molding Capabilities

### Trust

Your relationship with **Legacy Molding** will be based on an understanding that we must *earn your trust and respect*. This is accomplished through our strict observance of your confidentiality and the fact that we will commit 100% of our resources to the success of your molding project. *Your timeline drives our schedule* - milestones will be met and excuses will not be part of our vocabulary. We understand that in the end, **only results matter**.

### Agility

An organization like **Legacy Molding** is *not* affected by the inertia that constrains larger companies in their quest to be customer responsive. Our lean, horizontal organization reacts quickly - compressing lead times to a duration that Legacy Molding customers have come to expect. **Short-run** jobs are a specialty; **fast turn around** is simply our way of doing business.

### Technology

A finished product that consistently conforms to requirements and meets customer expectations is the result of structured process control *and* an investment in technology. **Legacy Molding** employs the latest technology as a means to success:

- **Servo-Electric** injection molding presses; 50 ton to 500 ton
- Intelligent application of **robotics**
- Thorough **quality planning** for every job
- Remaining current on **advances** made within the plastics industry

### Value-Added Services

Legacy Molding also offer a variety of value-added services including ultrasonic insert welding and light assembly

# LEGACY MOLDING CORPORATION

## Complete Injection Molding Services

- 3D Mold Design
- Troubleshooting of existing, difficult molds
- Extensive experience with a variety of materials
- Guaranteed Performance

## No-Risk "Test Drive"

We're confident that we possess all the qualities to make your project successful. Accordingly, we offer the no-risk "test drive" option that enables you to experience the **Legacy Molding** promise first hand. We'll install your mold into our presses and produce a trial run of parts for your approval. If you are dissatisfied for *any* reason, there will be no charge for this service.

**Now that's Confidence!**
